

## Full Frame bag / Pattern Manual

Please cut a paper pattern matching your frames measurements.  
Write us an email and post your paper pattern to the workshop at the address below.

The more precise your paper pattern the better!

- Please mark the following parts: bottle cage eyelets, cable guides, derailleur clamp and any other braze-ons your frame may have.
- If the frame bag is to be attached to the bottle boss eyelets then please ensure these markings are accurate.
- Please also give an indication of the diameter or circumference of your frames tubing
- Please indicate on which side you would like the zipped opening to be: for example two on the drive-side, two on the non-drive-side or one on either (and in that case please also specify which side should be above and which below).
- Two zippers and one removable compartment divider are included in the base price.
